

Our Principles

International
Growth
Team AMER

Beyond the Insight

We strive to be the most influential and impactful sellers in the industry by going beyond the immediate insight.

Our role is to craft compelling stories and innovative solutions that transform sales pitches into strategic partnerships.

By delivering bold ideas that transcend language and culture, we achieve real results that position us as an indispensable partner in our customers' global success.

Strategic Cartographers

In a complex global landscape, we provide clarity.

As strategic cartographers, we are driven by transforming ambiguity into a clear path forward.

We see the “big global picture,” empowering us to connect the dots and chart a course for our clients' future success.

We are the trusted advisors who draw the map.

Adaptive, Innovative, Resourceful

We work as entrepreneurs at heart, embracing the unpredictable global landscape as an opportunity to solve new and complex problems.

We have the agency to identify and seize opportunities, delivering creative and sustainable solutions.

This means acting with an owner's mentality while always keeping broader team and client goals in sight.

We Succeed Together

We are more than colleagues; we are each other's **champions & challengers**.

Our success is a collective effort, driven by a shared passion and appreciation that compels us to go above and beyond for our teammates.

We celebrate our successes with genuine enthusiasm, own our mistakes transparently, learn from them rapidly, and ask for help unapologetically.

With a foundation of trust, we communicate openly, constructively, and without judgment in order to work for the betterment of the team, even when it means disrupting the status quo.

A team built to serve the world must look like the world.

That is why we are globally diverse by design, a composite of the world's cultures, experiences, and perspectives.

This structure makes us fluent in the nuances of international markets and is more than a strategic advantage:

this is our superpower.
